

**“My Waste Force  
disposer is  
essential to  
keeping my  
kitchen clean.  
Every home  
should have one!”**

Tom Gardiner

## WHY USE A WASTE DISPOSAL UNIT?

A waste disposal unit brings many benefits to a modern day kitchen and is no longer the preserve of expensive homes. With ever rising waste costs being passed on to the consumer and recycling schemes now mandatory, it makes perfect sense to invest in one:

- ✓ Disposes of kitchen waste instantly – all manner of scraps, leftovers, peelings, veg, fruit husks and even poultry bones.
- ✓ Saves time – clearing up is so much easier and quicker.
- ✓ Hygienic – no more rotting waste to deal with.
- ✓ Saves space – all that bulk food waste is gone.
- ✓ Stops vermin & insects – rats and vermin are no longer in your bins.
- ✓ Stops bad smells and mess – no more split bags to deal with.
- ✓ Reduces your recycling bins – saves time, space and mess.
- ✓ Saves landfills and greenhouse gas production.
- ✓ Recycles your waste into electricity.
- ✓ Greener and better than composting.
- ✓ Saves money on bin bags.

## WHAT COULD BE EASIER?

Just turn on the tap, push the air-switch button and throw in your waste. It is simply and safely ground into fine particles in seconds and then flushed down the sink to the sewage works. Here it is recycled into electricity avoiding the production of harmful greenhouse gases and adding to landfills – a double benefit for the environment!

# WHY WASTE FORCE?

Waste Force Disposers are the best value units available on the market today. They are made to our own high specifications with many useful features by a major disposer manufacturer. Food waste disposal is an aggressive activity and calls for a really robust standard of design and manufacture. Waste Force doesn't compromise on the quality of any of its components.

Waste Force units embody everything you would expect in a quality waste disposal unit and more. Check out the following important features to guarantee you trouble-free great performance and a long life:

## FEATURE

High start speed burst of 4,000 rpm

High running speed of 2,800 rpm

Permanent magnet motor to give instant power on startup

Balanced stainless steel turntable and armature

Aerospace SoundSure Insulation

Cast stainless steel impellers

Removable splash guard

Lifetime corrosion warranty

10 Year Warranty

Built in air-switch

MountMaster locking system

Corrosion proof dishwasher inlet

Slimline unit available

Single grinding chamber

## BENEFIT

Delivers ultra-high starting torque to prevent jams

High operating grinding power

Completely eliminates clogging, binding and jamming

Quiet operation

Quiet operation

Long life, no blunting and high performance

Easy cleaning

Reliability and long life

Reliability and long life

Safe operation

Quick and easy installation

Easier waste plumbing configuration

For tight space constraints

Uses less space
